

JAVIER DAVID MARADIAGO

JMaradiago2000@gmail.com | 629.217.4797 | Murfreesboro, TN 37031

Summary

Versatile Software Developer with 3 years of dedicated involvement in software development. My core competencies encompass a wide array of technologies including .NET, SQL Server, Microsoft Azure, Jenkins, SonarQube, Postman, Docker, Git, and GitHub. Furthermore, I possess proficiency in Node.js, Python (Django), TypeScript, JavaScript, React, HTML, and CSS. I maintain a proactive stance towards continuous learning and adaptation, readily embracing new technologies to meet the evolving needs of my team and projects.

Skills

- Development of RESTful APIs and console applications using .NET.
- Proficient in SQL Server for database administration and management.
- Experience in leveraging Microsoft Azure to orchestrate project pipelines and facilitate code deployment.
- Version control and collaboration using Git & GitHub.
- Building interactive web applications with Angular.
- Implementation of continuous integration and continuous deployment (CI/CD) processes with Jenkins.
- Utilization of SonarQube for code quality analysis and continuous inspection.
- Testing and API development using Postman.
- Containerization of applications using Docker.

Experience

Software Developer | Optecom S.A – Cali, Colombia | 08/2022 – 12/2023

- Designed, developed, and deployed robust backend solutions for diverse projects.
- Collaborated closely with cross-functional teams to create APIs, integrate with existing APIs, and develop console applications tailored to client needs.
- Assumed ownership of the full spectrum of backend development, including database design and management in both on-premise and cloud environments.
- Utilized SQL Server expertise to optimize stored procedures, ensuring efficient data retrieval and manipulation.
- Demonstrated proficiency in cloud technologies, particularly Microsoft Azure, by orchestrating project pipelines and facilitating seamless deployments.
- Deployed and managed applications on both on-premise and cloud servers, ensuring optimal performance and reliability.
- Actively contributed to full-stack projects, architecting solutions encompassing backend, database, and frontend components.
- Utilized Docker for packaging applications, streamlining deployment processes.
- Embraced Agile methodologies, particularly Scrum, to drive project success through iterative development and continuous improvement.
- Thrived in a dynamic, collaborative environment, fostering cross-disciplinary collaboration across Cloud, DevOps, and architecture.
- Maintained a proven track record of delivering innovative solutions and exhibiting a commitment to excellence in software development.

Junior Developer | ARUS S.A – Cali, Colombia | 12/2018 - 07/2022

- Assisted in the development and integration of APIs, as well as the creation of console applications according to project specifications.
- Collaborated with team members across departments, including Cloud, DevOps, and architecture, to achieve project goals.
- Supported the team in modifying both frontend and backend components of applications created for internal clients, ensuring alignment with project requirements.
- Contributed to backend development initiatives for various projects, collaborating closely with senior team members.
- Participated in application deployment and management activities, gaining exposure to both on-premise and cloud environments.
- Engaged in full-stack projects, assisting in the development of backend, database, and frontend components.
- Acquired knowledge of Agile methodologies, such as Scrum, and actively contributed to project sprints and meetings by working on user stories assigned to the team.
- Demonstrated a proactive attitude towards learning and growth, leveraging opportunities to build skills and contribute to team success.

Education & Training

Santiago de Cali University | Cali, Colombia | 07/2016
Industrial Engineering Concentration: Software
Development Processes

Bootcamp Academlo | Remote, Mexico | 10/2022
Full Stack Development and Computer Science
Programming

Languages

- English: Second Language
- Spanish: Native
